About Me

As a proactive and driven Computer Science student, I possess a deep, practical foundation in programming and system design. My approach is to consistently deliver high-quality results, not merely meeting expectations but actively taking the initiative to find and implement improvements. I thrive under pressure and adapt quickly to new technical challenges, always maintaining a strong focus on effective problem-solving and code efficiency.

Experience

JANUARY 2024 – MAY 2024

IT Support | Dundee Central Library

In this role, I demonstrated effective problem-solving and communication skills crucial for teamwork and client interaction.

- **Applied Problem-Solving:** Successfully assisted individuals from diverse backgrounds with critical IT needs, including navigating essential housing and public service websites, and resolving specific technical issues like document printing.
- **Process Efficiency:** Streamlined the process for assigning and renewing SIM cards, regularly handling technical procedures with accuracy and patience.
- **Communication & Patience:** Developed exceptional user-facing communication skills, translating complex technical steps into easily understandable instructions for non-technical users.

Skills

- Java / C / C++
- HTML / Web Design
- Computer Literacy / Excel Spreadsheet
- Numeracy
- Team Management
- Communication
- Time Management

Education

SEPTEMBER 2024 – PRESENT

Computer Science with Industrial Placement | University of Dundee | Bachelor of Science

AUGUST 2018 – MAY 2024

St Paul's RC Academy | Dundee

- Advanced Higher Maths – A
- Higher Physics – A
- Higher Engineering Science – A
- Higher Design and Manufacture - A
- Higher Applications of Maths – A
